Supportive Front line guidewire

ASAHI SION blue ES PTCA GUIDE WIRE

An extra support type wire joins the line-up of ASAHI SION Series.
A wire that stabilizes the guide catheter for stress-free device delivery.

Characteristics

- **Contribute to a stable device delivery**
Well balanced reinforced shaft enhances guiding catheter disengagement during device delivery.
- **Inherits the maneuverability of SION TECC**
Usable as a frontline guide wire with easy control for branch selection and minimal loss of steerability in tortuous vessels.

Support

Stable device delivery by improving shaft reinforce.

All the data were obtained by company standardized test, which may differ from industry standardized tests.
All the data do not guarantee that all devices have exactly the same performance with the samples used for tests.

SION TECC

- Enhanced tip durability
- Combination of flexibility and torque force
- Reduced whipping of the wire due to superior torque response

ASAHI's unique guide wire technology with Composite Core
